MINIMUM FLOW RELEASE FROM THE GREENWOOD RESERVOIR TO THE MIDDLE BRANCH ESCANABA RIVER REDUCED BECAUSE OF DROUGHT CONDITIONS. On March 29, 2007, the Michigan Department of Environmental Quality's Land and Water Management Division (LWMD) authorized the temporary reduction of the minimum flow release to the Middle Branch Escanaba River. This action is in response to a petition from the Tilden Mining Company. The LWMD concurs that the watershed is experiencing a severe drought; and if weather conditions do not improve, there is a risk that the Greenwood Reservoir will not refill this spring and, therefore, reach conservation pool elevations later in the year. The required minimum flow release from April 1, 2007, until May 15, 2007, will be 12 cfs. This authorization is pursuant to the Tilden Mining Company's Amended Order and Permit dated November 2, 1998, issued under the authority of Part 35, Use of Water in Mining Low-Grade Ore, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. Information Contact: **David A. Hamilton**, 517-335-3174.

WATER BUREAU

2008 SECTION 303(d), 305(b), AND 314 INTEGRATED REPORT – REQUEST FOR AMBIENT WATER QUALITY DATA FOR MICHIGAN SURFACE WATERS. The Michigan Department of Environmental Quality, Water Bureau (DEQ-WB) is requesting ambient water quality data (chemical,

biological, or physical) that has been obtained by other governmental agencies, non-governmental organizations, or the public for Michigan surface waters since January 1, 2005. All water quality data submitted to the DEQ-WB before July 9, 2007, will be evaluated and potentially used to help prepare Michigan's 2008 Section 303(d), 305(b), and 314 Integrated Report. Every two years, the DEQ-WB prepares and submits an Integrated Report to the U.S. Environmental Protection Agency to satisfy the listing requirements of Section 303(d) and the reporting requirements of Sections 305(b) and 314 of the Clean Water Act. The Integrated Report describes the status of water quality in Michigan and includes a list of water bodies that are not attaining Michigan Water Quality Standards and require the establishment of pollutant Total Maximum Daily Loads. All ambient water quality data (including associated quality assurance/quality control information) provided for Michigan surface waters should be sent, preferably electronically, with a short cover Email note/letter to **Kay Edly**, Michigan Department of Environmental Quality, Water Bureau, 525 West Allegan Street, P.O. Box 30273, Lansing, Michigan 48909-7773, 517-373-4633, or Email at edlyk@michigan.gov.

DEADLINE FOR PUBLIC COMMENT REGARDING PROPOSED GENERAL PERMIT

CATEGORY FOR REMOVAL OF QUALIFYING SMALL DAMS IN THE STATE OF MICHIGAN.

Pursuant to Part 301, Inland Lakes and Streams; and Part 303, Wetlands Protection, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, the MDEQ's Land and Water Management Division is proposing to issue a new General Permit (GP) to support the removal of qualifying small dams less than two feet in height as defined in Section 30105 of Part 301, Inland Lakes and Streams, with an overall goal of improving stream habitat in Michigan. Parts 301 and 303 authorize the issuance of GPs for categories of activities that are similar in nature, will cause only minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse effect on the environment. If this GP is approved, then the MDEQ may review and authorize specific dam removal projects under this GP in an accelerated manner without issuance of any additional public notice. In order to qualify for authorization under this GP, criteria specified in the proposed GP must be met. These criteria include limitations on the size of the dam and associated impoundment, basic environmental considerations, and requirements regarding restoration of the stream channel and associated wetlands following dam removal. In addition, permission of all property owners riparian to the dam's impoundment is required prior to dam removal. The detailed draft GP can be found at

www.michigan.gov/deqinlandlakes, or may be requested from the address given below. Written comments should be submitted directly to the Michigan Department of Environmental Quality, Land and Water Management Division, P.O. Box 30458, Lansing, Michigan 48909-7958 to the attention of Peg Bostwick. All comments must be received by May 18, 2007. Information Contact:
